Penjelasan singkat:
jadi pertama git clone dengan link bang ferdinan jika sudah harus diatur ulang kembali dengan composer install, berhubung ku error kembali jadi uptade dahulu, jika sudah di composer uptade sung saja atur di env. Apa saja yang perlu.. begitu pun di artisan key:generate.. selebihnya atur saja bagian php artisan migrate:fresh dan juga php artisan db:seed.. untuk buka kita tambahkan terminal dimana 1 untuk buka php 1 lagi bagian logiccnya yaitu npm run dev jika belum di install, install dahulu dengan npm install..
